TOXICOLOGY

SUBJECT INDEX

Volume 63 (1990)

acetaldehyde metabolism, ethanol consumption, hepatic mitochondria, 113
Ah receptor agonists, polychlorinated biphenyls, immunosuppressive activities, partial antagonists, structure-activity relationships, 97
alloxan, streptozotocin, cytoplasmic Ca^{2+} oscillations, pancreatic β-cells, glucose, 263
amines, Clara cells, paraquat, antioxidant, lung, 315
anilines, nephrotoxicity, rats, halogenated hydrocarbons, 215
anticonvulsant, calcium valproate, valproic acid, sodium valproate, general toxicology, 137
antioxidant, Clara cells, paraquat, amines, lung, 315
antitumoral, doxorubicin, mitoxantrone, hepatotoxicity, lipid peroxidation, chemiluminescence, 187
arsenic, methylation, rat tissues, 73
arsine gas, oxidative damage, red blood cells, Heinz bodies, methemoglobin, glutathione, 25
arteriosclerotic plaques, pigeons, chlorinated water, dietray Ca^{2+}, lipids, 301

B6C3F1 mice, dichloroacetate, trichloroacetate, hepatocarcinogenesis, 341
beagle dogs, 2,4,6-trinitrotoluene, hemolytic anemia, hepatotoxicity, 233
bezafibrate, peroxisome proliferator, clofibrate, Di(2-ethylhexyl)phthalate, hydrogen peroxide, 199
biological monitoring, cadmium, occupational exposure, urinalysis, metallothionein, in vivo neutron activation analysis, radioimmunoassay, 53
blastocyst culture, selenite, selenate, embryo, toxicity, placental transfer, limb bud culture, 123
body weight control, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, macronutrient self-selection, saccharin consumption, sucrose consumption, induction of satiety, 285

cadmium, metallothionein induction, metallothionein-l mRNA induction, zinc, 273
cadmium, occupational exposure, urinalysis, metallothionein, biological monitoring, in vivo neutron activation analysis, radioimmunoassay, 53
cadmium, testis, ethane dimethanesulphonate, Leydig cell, microcirculation, 183
calcium valproate, valproic acid, sodium valproate, anticonvulsant, general toxicology, 137
carbadox, quindoxin, olaquindox, cyadox, growth promoters, photoallergy, oxaziridine, 85
catalase-inhibition, nickel, 45
chemiluminescence, doxorubicin, mitoxantrone, hepatotoxicity, lipid peroxidation, antitumoral, 187
chlorinated water, pigeons, dietray Ca^{2+}, lipids, arteriosclerotic plaques, 301
cholinesterase, lipoproteins, lysophosphatidylcholine, phosphatidylcholine, thioacetamide, 245
Clara cells, paraquat, antioxidant, amines, lung, 315
clofibrate, peroxisome proliferator, bezafibrate, Di(2-ethylhexyl)phthalate, hydrogen peroxide, 199
cyadox, quindoxin, carbadox, olaquindox, growth promoters, photoallergy, oxaziridine, 85
cytoplasmic Ca^{2+} oscillations, streptozotocin, alloxan, pancreatic β-cells, glucose, 263

Di(2-ethylhexyl)phthalate, peroxisome proliferator, clofibrate, bezafibrate, hydrogen peroxide, 199

diabetes mellitus, nephrotoxicity, succinimides, 327
dichloroacetate, trichloroacetate, hepatocarcinogenesis, B6C3F1 mice, 341
dichloroacetic acid, trichloroacetic acid, lactate metabolism, water pollutants, 63
dietray Ca^{2+}, pigeons, chlorinated water, lipids, arteriosclerotic plaques, 301
dimethylnitrosamine, immunosuppression, role of metabolism, 1
distribution, monochloroacetic acid, whole-body autoradiography, 35
doxorubicin, mitoxantrone, hepatotoxicity, lipid peroxidation, chemiluminescence, antitumoral, 187

embryo, selenite, selenate, toxicity, placental transfer, limb bud culture, blastocyst culture, 123
enterohepatic recirculation, paraquat, immunohistochemistry, small intestine, liver, kidney, 167
ethane dimethanesulphonate, testis, cadmium, Leydig cell, microcirculation, 183
ethanol consumption, acetaldehyde metabolism, hepatic mitochondria, 113

general toxicology, calcium valproate, valproic acid, sodium valproate, anticonvulsant, 137
glucose, streptozotocin, alloxan, cytoplasmic Ca^{2+} oscillations, pancreatic β-cells, 263
glutathione, arsine gas, oxidative damage, red blood cells, Heinz bodies, methemoglobin, 25
growth promoters, quindoxin, carbadox, olaquindox, cyadox, photoallergy, oxaziridine, 85

halogenated hydrocarbons, anilines, nephrotoxicity, rats, 215
Heinz bodies, arsine gas, oxidative damage, red blood cells, methemoglobin, glutathione, 25
hemolytic anemia, 2,4,6-trinitrotoluene, beagle dogs, hepatotoxicity, 233
hemorrhage, *d*-α-tocopherol, vitamin E, vitamin K, 157
hepatic mitochondria, acetaldehyde metabolism, ethanol consumption, 113
hepatocarcinogenesis, dichloroacetate, trichloroacetate, B6C3F1 mice, 341
hepatotoxicity, doxorubicin, mitoxantrone, lipid peroxidation, chemiluminescence, antitumoral, 187
hepatotoxicity, 2,4,6-trinitrotoluene, beagle dogs, hemolytic anemia, 233
hydrogen peroxide, peroxisome proliferator, clofibrate, bezafibrate, Di(2-ethylhexyl)phthalate, 199

immunohistochemistry, paraquat, small intestine, liver, kidney, enterohepatic recirculation, 167
immunosuppression, dimethylnitrosamine, role of metabolism, 1
immunosuppressive activities, polychlorinated biphenyls, Ah receptor agonists, partial antagonists, structure-activity relationships, 97
induction of satiety, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, macronutrient self-selection, saccharin consumption, sucrose consumption, body weight control, 285
in vivo neutron activation analysis, cadmium, occupational exposure, urinalysis, metallothionein, biological monitoring, radioimmunoassay, 53

kidney, paraquat, immunohistochemistry, small intestine, liver, enterohepatic recirculation, 167

lactate metabolism, trichloroacetic acid, dichloroacetic acid, water pollutants, 63
Leydig cell, testis, cadmium, ethane dimethanesulphonate, microcirculation, 183
limb bud culture, selenite, selenate, embryo, toxicity, placental transfer, blastocyst culture, 123
lipids, pigeons, chlorinated water, dietray Ca^{2+}, arteriosclerotic plaques, 301
lipid peroxidation, doxorubicin, mitoxantrone, hepatotoxicity, chemiluminescence, antitumoral, 187
lipoproteins, cholinesterase, lysophosphatidylcholine, phosphatidylcholine, thioacetamide, 245
liver, paraquat, immunohistochemistry, small intestine, kidney, enterohepatic recirculation, 167
lung, Clara cells, paraquat, antioxidant, amines, 315
lysophosphatidylcholine, cholinesterase, lipoproteins, phosphatidylcholine, thioacetamide, 245

macronutrient self-selection, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, saccharin consumption,

sucrose consumption, body weight control, induction of satiety, 285
metallothionein, cadmium, occupational exposure, urinalysis, biological monitoring, in vivo neutron activation analysis, radioimmunoassay, 53
metallothionein-l mRNA induction, cadmium, metallothionein induction, zinc, 273
metallothionein induction, cadmium, metallothionein-l mRNA induction, zinc, 273
methemoglobin, arsine gas, oxidative damage, red blood cells, Heinz bodies, glutathione, 25
methylation, arsenic, rat tissues, 73
microcirculation, testis, cadmium, ethane dimethanesulphonate, Leydig cell, 183
mitoxantrone, doxorubicin, hepatotoxicity, lipid peroxidation, chemiluminescence, antitumoral, 187
monochloroacetic acid, distribution, whole-body autoradiography, 35

nephrotoxicity, anilines, rats, halogenated hydrocarbons, 215
nephrotoxicity, diabetes mellitus, succinimides, 327
nickel, catalase-inhibition, 45

occupational exposure, cadmium, urinalysis, metallothionein, biological monitoring, in vivo neutron activation analysis, radioimmunoassay, 53
olaquindox, quindoxin, carbadox, cyadox, growth promoters, photoallergy, oxaziridine, 85
oxaziridine, quindoxin, carbadox, olaquindox, cyadox, growth promoters, photoallergy, 85
oxidative damage, arsine gas, red blood cells, Heinz bodies, methemoglobin, glutathione, 25

pancreatic β-cells, streptozotocin, alloxan, cytoplasmic Ca^{2+} oscillations, glucose, 263
paraquat, Clara cells, antioxidant, amines, lung, 315
paraquat, immunohistochemistry, small intestine, liver, kidney, enterohepatic recirculation, 167
partial antagonists, polychlorinated biphenyls, immunosuppressive activities, Ah receptor agonists, structure-activity relationships, 97
peroxisome proliferator, clofibrate, bezafibrate, Di(2-ethylhexyl)phthalate, hydrogen peroxide, 199
phosphatidylcholine, cholinesterase, lipoproteins, lysophosphatidylcholine, thioacetamide, 245
photoallergy, quindoxin, carbadox, olaquindox, cyadox, growth promoters, oxaziridine, 85 pigeons, chlorinated water, dietray Ca^{2+}, lipids, arteriosclerotic plaques, 301
placental transfer, selenite, selenate, embryo, toxicity, limb bud culture, blastocyst culture, 123
polychlorinated biphenyls, immunosuppressive activities, Ah receptor agonists, partial antagonists, structure-activity relationships, 97

quindoxin, carbadox, olaquindox, cyadox, growth promoters, photoallergy, oxaziridine, 85

radioimmunoassay, cadmium, occupational exposure, urinalysis, metallothionein, biological monitoring, in vivo neutron activation analysis, 53
rats, anilines, nephrotoxicity, halogenated hydrocarbons, 215
rat tissues, arsenic, methylation, 73
red blood cells, arsine gas, oxidative damage, Heinz bodies, methemoglobin, glutathione, 25
role of metabolism, dimethylnitrosamine, immunosuppression, 1

saccharin consumption, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, macronutrient self-selection, sucrose consumption, body weight control, induction of satiety, 285
selenate, selenite, embryo, toxicity, placental transfer, limb bud culture, blastocyst culture, 123
selenite, selenate, embryo, toxicity, placental transfer, limb bud culture, blastocyst culture, 123
small intestine, paraquat, immunohistochemistry, liver, kidney, enterohepatic recirculation, 167
sodium valproate, calcium valproate, valproic acid, anticonvulsant, general toxicology, 137
streptozotocin, alloxan, cytoplasmic Ca^{2+} oscillations, pancreatic β-cells, glucose, 263
structure-activity relationships, polychlorinated biphenyls, immunosuppressive activities, Ah receptor agonists, partial antagonists, 97
succinimides, diabetes mellitus, nephrotoxicity, 327

sucrose consumption, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, macronutrient self-selection, saccharin consumption, body weight control, induction of satiety, 285

testis, cadmium, ethane dimethanesulphonate, Leydig cell, microcirculation, 183
2,3,7,8-tetrachlorodibenzo-*p*-dioxin, macronutrient self-selection, saccharin consumption, sucrose consumption, body weight control, induction of satiety, 285
thioacetamide, cholinesterase, lipoproteins, lysophosphatidylcholine, phosphatidylcholine, 245
d-α-tocopherol, vitamin E, vitamin K, hemorrhage, 157
toxicity, selenite, selenate, embryo, placental transfer, limb bud culture, blastocyst culture, 123
trichloroacetate, dichloroacetate, hepatocarcinogenesis, B6C3F1 mice, 341
trichloroacetic acid, dichloroacetic acid, lactate metabolism, water pollutants, 63

2,4,6-trinitrotoluene, beagle dogs, hemolytic anemia, hepatotoxicity, 233

urinalysis, cadmium, occupational exposure, metallothionein, biological monitoring, in vivo neutron activation analysis, radioimmunoassay, 53

valproic acid, calcium valproate, sodium valproate, anticonvulsant, general toxicology, 137
vitamin E, *d*-α-tocopherol, vitamin K, hemorrhage, 157
vitamin K, *d*-α-tocopherol, vitamin E, hemorrhage, 157

water pollutants, trichloroacetic acid, dichloroacetic acid, lactate metabolism, 63
whole-body autoradiography, monochloroacetic acid, distribution, 35

zinc, cadmium, metallothionein induction, metallothionein-l mRNA induction, 273
